Professional Summary

Computer Science undergraduate at NIT Durgapur with internship experience in full-stack web development (MERN Stack, Next.js) and SAP enterprise development (ABAP, CDS Views, OData, BTP). Proficient in building scalable RESTful APIs and real-time systems using JavaScript, TypeScript, and Python; experienced in Agile/Scrum, OOP, unit testing, and version control workflows.

Education

National Institute of Technology, Durgapur **Aug 2023 – May 2027**
Bachelor of Technology in Computer Science and Engineering | CGPA: 6.51/10 *Durgapur, West Bengal*

Experience

Accenture **May 2026 – July 2026**
Custom Software Engineering Associate Intern *Bengaluru, Karnataka*

- Developed and enhanced 10+ ABAP programs using Eclipse ADT on SAP BTP, applying OO-ABAP principles, Open SQL, and modular design patterns to improve code reusability.
- Designed CDS Views and AMDP functions for HANA-based data processing; performed root-cause debugging and managed transport requests across DEV, QA, and PRD environments.
- Implemented and tested OData services integrated with SAP Fiori applications using the RAP framework and service binding on BTP.
- Collaborated in bi-weekly Agile/Scrum sprint cycles with cross-functional teams, contributing to peer code reviews and improving delivery quality.

Infosys SpringBoard **Sep 2025 – Nov 2025**
Project Intern *Remote*

- Designed and developed a full-stack web application module applying OOP principles, RESTful API design patterns, and modular application architecture.
- Implemented Git-based version control (feature branching, pull requests) and followed Agile SDLC across planning, development, testing, and deployment phases.
- Conducted unit testing and systematic debugging to identify and resolve software defects, improving code reliability and overall module quality.

Projects

AI Voice Sales Assistant | *Next.js, MongoDB, AI, Voice Processing* **GitHub**

- Developed an AI-powered voice assistant enabling natural language book search and order placement, streamlining the end-to-end purchasing workflow through voice interactions.
- Integrated Web Speech API and NLP pipelines for real-time voice command recognition with multi-intent detection across search, browse, and checkout flows.
- Designed scalable RESTful backend APIs using Next.js and MongoDB, supporting real-time workflows and an admin dashboard for managing 100+ product records.

Real-Time Messaging Platform | *MERN Stack, Socket.io, JWT, WebSocket* **GitHub**

- Built a production-ready full-stack real-time chat application using the MERN stack with secure JWT-based user authentication and protected route middleware.
- Implemented Socket.io and WebSocket communication for low-latency bi-directional messaging, supporting multiple concurrent chat rooms with real-time delivery.
- Developed 10+ RESTful API endpoints for user management, authentication, and persistent message storage using MongoDB with efficient indexed queries.

Distributed File Sharing System | *C, Socket Programming, POSIX Threads, SQLite* **GitHub**

- Developed a multithreaded client-server file sharing system in C using POSIX threads and socket programming, reliably handling 20+ simultaneous client connections.
- Implemented secure login, role-based access control (RBAC), and resumable file transfer protocols, improving system security and fault tolerance.
- Managed concurrent requests via a thread-pool architecture and integrated SQLite for persistent storage of user credentials, file metadata, and access permissions.

Technical Skills

Languages: C, C++, Python, HTML, CSS, SQL, JavaScript, TypeScript.
SAP Technologies: SAP ABAP, ABAP on HANA, SAP BTP, CDS Views, AMDP, OData Services, RAP (Basics).
Frameworks & Libraries: MERN Stack (MongoDB, Express.js, React.js, Node.js), Next.js, Socket.io, Bootstrap, Tailwind CSS.
Developer Tools: Git, GitHub, VS Code, Eclipse ADT, SAP GUI, Postman, SAP Fiori (Basics).
Analytical & Visualization Tools: Excel, Power BI, Tableau, Google Sheets.

Leadership / Extracurricular

- Solved 260+ Data Structures & Algorithms problems across GeeksforGeeks and LeetCode, focusing on Arrays, Trees, Graphs, Dynamic Programming, and Binary Search.
- Served as an AI Engineer at Upstride, developing and integrating a CrewAI-based multi-agent AI assistant for a pharmaceutical company's website to automate user support and interactions.
- Actively lead community service initiatives as Management Head of the National Service Scheme (NSS), coordinating outreach events and managing volunteer teams.
